Summary

Computer Science student with experience in full-stack web development, UI/UX, data science, and NLP. Built and maintained web apps, led design work, and conducted research.

Education

BS	University of the Philippines Visayas , Computer Science	Miagao, Iloilo, Philippines
	- Cumulative GWA (1st Year): 1.22 — consistent President’s Lister - Relevant Coursework: Foundations of Programming, Discrete Mathematics	Aug 2024 – present
SHS	Maloco National High School , STEM	Ibajay, Aklan, Philippines
	- Awards: With Highest Honor, DOST-SEI Undergraduate Scholarship - Relevant Coursework: Research Capstone Project, Practical Research 1 & 2	2022 – 2024

Experience

Supreme Secondary Learner Government , Vice President	Maloco NHS
- Led the creation of the student council’s visual identity, including logo design and promotional assets. - Designed graphic materials for social media, tarpaulins, backdrops, flyers, and other publications.	2023 – 2024
Hilltop (School Publication) , School Paper Layout Artist	Maloco NHS
- Designed 12-page tabloid school newspapers, which served as the school’s entry for the Division Schools Press Conference. - Collaborated with writers and editors to ensure visual design aligns with content.	2023 – 2024
Philippine Startup Challenge 7 MATHuto , Startup Co-founder	2022 – 2022
- Co-founded a startup that developed a mobile application to gamify math learning for Grade 1 students. - Contributed to branding, UI/UX design, and pitch presentations for the startup competition.	

Projects

Aklish	2024 – 2025
A web application for crowdsourcing Aklanon-English translations - Developed CRUD functionality for translations and dictionaries using Django and React. - Created a dictionary-based Aklanon spellchecker using the SymSpellPy library. - Developed a Python library for Aklanon word stemming to improve the spell-checker. - Managed and iteratively improved the application based on input from 30 users.	
TagLID	2023 – 2024
A word level Language Identification (LID) tool for Tagalog-English (Taglish) text - Utilized traditional Natural Language Processing (NLP) techniques to identify language of each word. - Created a Python library for Tagalog word stemming to improve Tagalog language detection. Web scraped a Tagalog dictionary website and parsed XML files from an English dictionary using BeautifulSoup4. - Derived metrics on code-switching frequency from data collected from 57 respondents.	

Skills

Tools and Technologies: Python, Django, JavaScript, TypeScript, React, Next.js, TailwindCSS, Git, Adobe Photoshop, Illustrator, InDesign

Industry Knowledge: Web development and design, Natural Language Processing, Data analysis

Interpersonal Skills: Problem-solving, Adaptability, Teamwork, Communication

Languages: English (Professional working proficiency), Tagalog (Professional working proficiency)
