Summary

Computer Science student specializing in full-stack web development, UI/UX design, and data science. Skilled in building and maintaining web applications, leading design projects, and conducting tech-driven research.

Education

BS Computer Science, University of the Philippines Visayas Miagao, Iloilo, Philippines
• Current Cumulative GWA: 1.15 (President's Lister) Aug 2024 – present
• Relevant Coursework: Web Programming, Database Systems

Experience

Lead Web Developer, Pagbutlak — Student Publication of College of Arts and Sciences Sept 2025 – present
Leading the early-stage development of the student publication website, aiming to replace the existing WordPress site with a modern, responsive platform.

- Designed the project architecture and tech stack with Next.js, PayloadCMS, and TailwindCSS.
- Established content migration strategy and editorial workflows to ensure smooth transition from the legacy site.

Branding and Creative Associate, UP Data Science Society Aug 2025 – Dec 2025
Supporting the society's branding and creative initiatives, with a focus on website development.

Web Developer, Komsai.Org — Organization for Computer Science Students Sept 2024 – present
Developing the organization's website using modern web technologies, streamlining content updates and improving the experience for student members.

Projects

renux [🔗](#) 2025 – 2025
Terminal-based bulk file renamer with a user-friendly TUI.

- Streamlined file renaming for developers and power users, improving productivity.
- Packaged as an installable Python TUI application, accessible to users on all platforms.
- Achieved **3,000+ downloads** on [PyPI](#) and 30+ stars on [GitHub](#).

UniGlyphs [🔗](#) 2025 – 2025
Browser extension for formatting text on any website using an inline toolbar.

- Enhanced web text formatting workflows for users across platforms.
- Developed a flexible **browser extension** supporting complex interactions on any website input.
- Gained 20+ users on [Chrome Web Store](#).

Aklish [🔗](#) 2024 – 2025
A web app for crowdsourcing Aklanon-English translations

- Built full **CRUD** functionality for translations using Django and React, enabling user-generated content.
- Implemented a dictionary-based Aklanon **spellchecker**, improving translation accuracy.
- Developed an Aklanon word **stemming** library, enhancing spell-check precision.
- Conducted user testing with 30 native speakers and iteratively improved UX, resulting in increased usability.

TagLID [🔗](#) 2024 – 2024
A word-level Language Identification (LID) tool for Tagalog-English (Taglish) text

- Utilized rule-based **Natural Language Processing** (NLP) techniques to identify the language of each word.
- Created a **Python library** for Tagalog word stemming to improve Tagalog language detection for inflected words.
- **Scraped** from Tagalog and English dictionaries using BeautifulSoup4 to generate frequency-based lookup tables.
- Computed code-switching frequency from 57 survey responses to automate data analysis for a language research study.

Skills

Tools: Python, Django, JavaScript, TypeScript, React, Next.js, TailwindCSS, Pandas, Scikit-learn, TensorFlow, PyTorch, Git, Docker

Industry Knowledge: Web development and design, machine learning, natural language processing, data analysis

Languages: English (Professional working proficiency), Tagalog (Professional working proficiency)
